DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-10, in the reply filed on 19 January 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 11-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 19 January 2007.

35 U.S.C. § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites a hybrid polypeptide sequence "identified as SEQ ID NO: 6," which "comprises" a VIP component and a GHRH component, and which is a selective VPAC1 receptor antagonist. Due to the recitation of "identified as" AND "comprising," it is not clear if the claim is limited to a peptide consisting of SEQ ID NO: 6, a peptide comprising SEQ ID NO: 6, or peptides that are variants of SEQ ID NO: 6. Thus, the metes and bounds of the claims cannot be determined.

Claim Objections

Claims 2-10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. As discussed above, it is unclear if the claims are limited to a peptide consisting of SEQ ID NO: 6, a peptide comprising SEQ ID NO: 6, or peptides that are variants of SEQ ID NO: 6. If claim 1 is intended to be limited to a peptide consisting of SEQ ID NO: 6, then all of the activity limitations recited in claims 2-10 fail to further limit the peptide of claim 1, since these activities would all be inherent to the peptide.

35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 98/02453.

As discussed above, it is unclear if the claims are limited to a peptide consisting of SEQ ID NO: 6, a peptide comprising SEQ ID NO: 6, or peptides that are variants of

SEQ ID NO: 6. The broadest reasonable interpretation of the claims is that they encompass variants of SEQ ID NO: 6 with similar activities.

WO 98/02453 teaches hybrid polypeptide sequences comprising a VIP component and a GHRH component, wherein the hybrid sequence is a selective VPAC1 antagonist. See peptide PG 97-269, page 1; top of p. 6. See IC50 ranges, p. 5, last paragraph; pp. 6-7. It is noted that the reference refers to VPAC1 receptor as VIP1 receptor. It is further noted that the reference's PG 97-269 differs from instant SEQ ID NO: 6 by only one amino acid residue:

PG 97-269	HFDAVFTNSYRKVLKRLSARKLLQDIL
SEQ ID NO: 6:	HFDAVFTNSYRKVLKRLSARKLLQSIL

It would have been reasonable to expect that PG 97-269 would have had similar activities to instant SEQ ID NO: 6 given the close structural similarity, absent evidence to the contrary.

Therefore, the claims do not define subject matter that is novel compared with WO 98/02453.

Conclusion

No claims are allowed.
